PROJECT BRAINSTORMING

Impact vs. Effort Prioritization Framework

PROJECT NAME	FACILITATOR	DATE	TARGET PHASE
[EV Market Analysis]	[Hansraj Sisodiya]	October 2026	Q4 Ideation

1. IMPACT VS. EFFORT PRIORITIZATION MATRIX

Map target ideas based on anticipated strategic impact versus implementation effort.

QUICK WINS — High Impact / Low Effort

1. **Automated Email Notifications:** Setup automated triggers for status updates to reduce manual customer success calls.
2. **Landing Page Copy Refresh:** Update value propositions above the fold to boost conversion rates immediately.
3. **Standardized Team Check-ins:** Adopt a structured 15-minute daily standup template.
4. **Export Feature Patch:** Add CSV export to existing analytics tab for self-serve reporting.

MAJOR PROJECTS — High Impact / High Effort

1. **Core Engine Refactoring:** Upgrade data processing pipeline to support real-time streaming updates.
2. **Mobile Application V2:** Re-architect Native iOS/Android apps for offline capability.
3. **Enterprise SSO Integration:** Implement SAML/Okta integration for enterprise tier access.
4. **Predictive Analytics Module:** Build ML-driven forecasting features for user dashboards.

FILL-INS / MINOR TASKS — Low Impact / Low Effort

1. **UI Icon Consistency Refresh:** Align secondary icon set across older internal tools.
2. **Footer Link Reorganization:** Clean up secondary navigation links in documentation portal.
3. **Team Wiki Re-indexing:** Archive stale internal confluence pages.

THANKLESS TASKS — Low Impact / High Effort

1. **Custom Legacy PDF Renderer:** Rewriting ancient rendering pipeline instead of migrating to modern standard.
2. **Multi-Theme UI Customizer:** Allowing full user-defined custom color palettes across the platform.
3. **Manual Back-catalog Tagging:** Hand-tagging 5,000 legacy blog posts.

2. EVALUATED IDEAS REGISTER

Detailed scoring framework (Scale 1–5: 1 = Lowest, 5 = Highest) to finalize execution order.

#	IDEA / FEATURE PROPOSAL	STRATEGIC VALUE (1-5)	IMPLEMENTATION COMPLEXITY (1-5)	PRIORITY STATUS	OWNER / RESOURCE NEEDED
1	**Automated Email Notifications**	5	1	P1 - Immediate	Product Ops / Marketing
2	**Landing Page Copy Refresh**	4	1	P1 - Immediate	Growth Lead / Copywriter
3	**Export Feature Patch**	4	2	P1 - Immediate	Backend Engineer (0.5 wk)
4	**Core Engine Refactoring**	5	5	P2 - Scheduled	Platform Architecture Team
5	**Enterprise SSO Integration**	5	4	P2 - Scheduled	Security / Auth Pod
6	**Mobile Application V2**	4	5	P2 - Scheduled	Mobile Engineering Team
7	**UI Icon Consistency Refresh**	2	1	P3 - Backlog	Design Intern / UI Design
8	**Footer Link Reorganization**	1	1	P3 - Backlog	Web Master
9	**Custom Legacy PDF Renderer**	2	5	Deprioritized	None (Cancelled)
10	**Multi-Theme Customizer**	1	4	Deprioritized	None (Cancelled)

3. NEXT STEPS & EXECUTION ROADMAP

SPRINT 1 ACTIVATION (QUICK WINS FOCUS)

Immediately schedule Ideas #1, #2, and #3 into the upcoming 2-week sprint planning session. Minimal engineering overhead required with high immediate impact on customer churn and user self-service efficiency.

DISCOVERY & FEASIBILITY (MAJOR PROJECTS)

Assign Tech Lead ownership to scoping Ideas #4 and #5. Conduct architecture spike during the next sprint to define strict milestone timelines and bandwidth requirements before committing Q1 resources.
